Aerial search finds missing senior's body

From the air. STARS helicopter locates Regina man, 86, in a field south of Wascana Trails

CARRIE-MAY SIGGINS
carriemay.siggins@metronews.ca

A Regina senior was found dead Tuesday morning after a STARS helicopter joined the search for the missing man.

At about 11:30 a.m., a half hour after the emergency air service team had started their search, the body of 86-year-old Donald Barnett was discovered outside the vicinity of Wascana hiking trails. His family had been the last to see him on Thursday morning, and his car had been discovered by RCMP on Friday in the trails parking lot.

Jason Oblinski was the pilot of the helicopter that found Barnett. He says that the aircraft was travelling at a low level above the area when something caught their eye. "We turned around and found out it was indeed the person we were looking for."

Oblinski says the body was in a field, just beside some trees down by the river on the south side of the Wascana Trails park.

This was the first search and rescue mission that STARS has assisted with in Regina. Oblinski says the air ambulance service is open to providing such help again for the RCMP in the future. "It's not our primary mandate, but it's a service that we can provide because we have the resources, and it doesn't affect our mandate."

Sgt. Paul Dawson of the Regina RCMP says the force was grateful for STARS' assistance. "We're appreciative of STARS and all the help that they provided," he says.

"Every different tool that you use brings different perspectives. And in this case it was the helicopter that was able to find this person and bring closure to the family."

The family has been notified of the discovery, and the provincial coroner will start an investigation into Barnett's death.

STARS

- STARS Air Ambulance is a non-profit organization dedicated to providing quick and highly-specialized emergency medical transport for those critically ill and injured. It officially launched its Saskatchewan program in Regina at the end of April.

Riders looking to tame Lions

Football rivalry. Intensity will go up a lot when team takes on B.C. at Saturday's game, quarterback Darian Durant says

JEFF MACKEY
jeff.mackey@metronews.ca

On a humid Tuesday at Mosaic Field the Riders began their preparations for their Saturday match-up against the B.C. Lions.

The defending Grey Cup champs will be the Riders most challenging test to date in their 2-0 season.

Saturday's game is made all the more interesting by the rivalry the two teams have developed.

"I told them (the players) this is like the Heat vs. the Celtics, this is like the Red Sox vs. the Yankees and New Orleans vs. Green Bay," said Riders Head Coach Corey Chamblin.

"The thing we try to do as veterans is just tell the rookies that the intensity when playing B.C is going to go up a lot," said Riders quarterback Darian Durant.

"They haven't lost yet and they are going to come in riding high so we have to match their intensity."

On the injured list

Will LaBatte be fit to play?

A question mark hangs over the head of guard Brendon LaBatte after his injury in Sunday's 17-1 win against the Edmonton Eskimos.

"It is just a shoulder injury at this point, we are still evaluating and there is still a chance that he might play," said Chamblin.

Chamblin has faith that if LaBatte can't play, guard Patrick Neufeld is ready to fill his spot.

Murder. Youth charged in city's 3rd homicide appears in court

A 16-year-old boy made his first appearance in youth court Tuesday after being charged with second-degree murder.

The murder charge was result of an altercation on Sunday night between the 16-year-old and the now-deceased Derrick Amyotte, 31, near 5th Avenue and Rae Street.

The 16-year-old was arrested by police around 10 p.m. Sunday night and taken into custody.

Amyotte was discovered one block west at 5th Avenue and Retallack where he received emergency medical treatment from EMS, was taken to hospital and died an hour later.

The incident is Regina's third homicide of 2012.

Parks. Electric services expanded at three provincial parks

The province has given 400 campsites in three provincial parks an extra charge as the provincial government is investing $1.6 million to further expand electric services.

"Government realizes that many people visiting our parks desire the convenience of electrified campsites, which is why we have added almost 1,100 electric campsites over the last four years, said Parks, Culture and Sport Minister Kevin Doherty, in a release. "These upgrades ensure an enhanced parks experience for everyone."

Services will be expanded at Rowan's Ravine Provincial Park, Duck Mountain Provincial Park and Moose Mountain Provincial Park and should be ready for the 2013 parks season. METRO

Mossbank

Saskatchewan town has no water due to a rupture in main water line

A town in south-central Saskatchewan has gone from having a drinking water advisory to having no water at all.

Warnings went out to residents that a boil water advisory would be in effect Monday afternoon for Mossbank, about 145 kilometres southwest of Regina.

That's because crews planned to make some repairs to the town's pumphouse, but then a main water line ruptured.

Town administrator Cynthia Kimball says it's not known how long the town will be without water.

Residents were given one hour Monday night to fill their tanks and are being reminded that all water used for washing or consumption needs to be boiled, once water is restored to the area.

Farmers who got water from the town's bulk tanks are now being re-routed to Assiniboia.

Impaired drivers

MADD tops up program funding with fees from liquor store bank machines

Mothers Against Drunk Driving is putting bank machines in what might seem like an unusual place — liquor stores in Regina.

It's a pilot project that will see MADD collect fees from the ATMs to support local activities, like school visits.

The machines are covered in MADD logos and have a sign for a road safety program called Report Impaired Drivers.

MADD spokesman Steve Raine says the machines send the message that if someone is going to drink, they should think about how they're going to get home.

The pilot is modelled on projects in Newfoundland and Labrador and Prince Edward Island.

Raine says it will be evaluated during the coming months, and there is the potential it could be installed in other liquor stores across Saskatchewan.

Warlord jailed: Is his partner next?

Lubanga gets 14 years. He and renegade Bosco Ntaganda sent child soldiers to kill and be killed

The International Criminal Court on Tuesday sentenced a Congolese warlord to 14 years in jail for using child soldiers.

But Thomas Lubanga's partner in crime has yet to be brought to justice.

Lubanga was found guilty in March of recruiting, kidnapping and abusing children — sending them to kill and be killed in tribal wars.

But Lubanga, who cried when he was put on a plane from Congo to The Hague in 2006, is a small player.

His case has brought more pressure for the arrest of renegade Congolese army Gen. Bosco Ntaganda. The ICC indicted both for war crimes involving child soldiers.

But a 2009 deal saw Ntaganda wearing the stripes of a general as he integrated his fighters into the Congolese army.

Sensing the end of the road this year, the veteran warlord took off and now is accused of orchestrating a new rebellion in April.

Judge Adrian Fulford said the time Lubanga has been detained will be deducted from the sentence, meaning the 51-year-old will be free before he turns 60.

Sting. Porn star part of plot to catch Luka Magnotta

Twin Playboy bunnies and an animal-rights group tried to enlist one of the world's biggest porn stars last year to help catch Luka Rocco Magnotta.

Ron Jeremy said he was asked to lure Magnotta, a small-time Canadian porn actor, to L.A. with a phoney job offer to appear in an X-rated flick.

The ploy was concocted more than a year before Magnotta became a murder suspect in the gruesome death of Montreal student Jun Lin.

Instead of meeting a legend who's cavorted for the camera in more than 2,000 adult films, Magnotta was to be apprehended by a hard-nosed group of animal-rights activists.

Jeremy, however, got cold feet and the sting operation never moved ahead.

At the time, animal-rights advocates had alleged that Magnotta killed kittens and posted videos of the deeds on the Internet — accusations he has publicly denied.

Jeremy, an active animal-rights campaigner, wanted to help out, but was uncomfortable with the whole idea of being the bait.

"That's a little bit out of my league, don't you think?" Jeremy said in a phone interview.

Ron Jeremy GETTY IMAGES

"It's like an episode from some TV show. The (guy) comes to the set with lube in one hand and his schmeckle in the other thinking he has a job, and the cops tackle him to the ground.

"That's good for the movies. That doesn't work in real life."

The idea for the trap was hatched by Rescue Ink, a group of rough-and-tumble activists based in N.Y. Its membership includes cops, military personnel and tattooed "street guys." THE CANADIAN PRESS

Too-smart phones? May know where you're going

Researchers have developed an algorithm that can predict where you will be in the future using data gathered from your friends' smartphones.

In the study of two hundred people, the algorithm was able to predict the location of some users 24 hours later within 100 metres, some as close as 20 metres. Mirco Musolesi, lead researcher and computer science lecturer at the University of Birmingham, said the algorithm is exploiting the synchronized rhythm of the city.

"I know this kind of thing looks kind of like Big Brother" said Musolesi.

"There is a problem for privacy, it is a big problem for these kind of services in general."

Still, if users' phone information could be protected, the algorithm has a potential future in targeted advertising, said Musolesi.

The algorithm predicts someone's movements by comparing their data with people in their social group. For example, if Bob usually goes to the gym on Tuesday, but instead does an errand, the algorithm will look to his friends, Jack and Joe. If Jack and Joe are doing their normal routine, the algorithm will, probably correctly, predict Bob will continue on to his normal routine, following his errand.

"The mutual information between these two patterns is very high," said Musolesi. "The movement of friends is highly coordinated, and synchronized." TORSTAR NEWS SERVICE

Prisoners earn days off by biking

Brazil. Program has inmates pedalling to produce electricity for city promenade

Brazilian inmate Ronaldo da Silva hops on a bicycle and pedals furiously, clocking up several kilometres before slowing down and jumping off.

Silva hasn't gotten far, in fact not an inch. He's still inside the medium-security prison where he's serving a 5.5-year sentence for holding up a bakery.

But he did move a bit closer to freedom. Silva is part of an innovative program that allows inmates at a prison in Brazil's southeastern Minas Gerais state to reduce their sentences in exchange for generating power to help illuminate the town.

By pedaling the prison's stationary bikes, the inmates charge a battery that's used to power 10 street lamps along the town's riverside promenade. For every three eight-hour days they spend on the bikes, Silva and the voluntary program's other participants get one day shaved off their sentences.

It is one of several new projects being implemented across Brazil, including literacy and book-reading programs, all aimed at thinning out notoriously overcrowded prisons and cutting down on recidivism by helping restore inmates' sense of self-worth. Lambasted by critics as too soft on criminals, such initiatives are seen by their defenders as effective ways of breaking the cycle of violence that reigns in the country's penitentiaries.

Win-win

"People who normally are on the margins of society are contributing to the community ..."

Gilson Rafael Silva, director of the prison exploring one way to manage crowded prisons

"We used to spend all day locked up in our cells, only seeing the sun for two hours a day," said 38-year-old Silva, whose missing front teeth speak to a life of hardships and privation. "Now we're out in the fresh air, generating electricity for the town and at the same time we're winning our freedom." Silva has already pedaled 20 days from his sentence.

The two-month-old program is the brainchild of the town's judge, Jose Henrique Mallmann, who said he got the idea from a story he read on the Internet about gyms in the U.S. where electricity is generated by the exercise bikes. THE ASSOCIATED PRESS

Thousands of turtle eggs were crushed on a beach in Trinidad & Tobago.
MARC DE VERTEUIL/PAPA BOIS CONSERVATION/THE ASSOCIATED PRESS

Turtle eggs crushed

A conservation group in Trinidad & Tobago is calling for an investigation into how government work crews crushed leatherback turtle eggs and hatchlings on a prime nesting beach. The endangered species' eggs and hatchlings were crushed by heavy machinery as workers redirected a shifting river over the weekend.

A conservation group says the government allowed the crew to operate "without any qualified supervision" on the ecologically sensitive Grand Riviere beach where the massive turtles nest. The group said it is "important to investigate how this was allowed to happen and to find a solution so this won't reoccur in the future."

Conservationists say they saw thousands of crushed leatherback eggs. THE ASSOCIATED PRESS

France. Arafat's widow wants probe into death

Suha Arafat THE ASSOCIATED PRESS FILE

The widow of Yasser Arafat will file a legal complaint in France asking authorities to investigate her husband's death, about which she has recently raised new suspicions, her lawyer said Tuesday.

Palestinian authorities gave final approval this week for the former Palestinian leader's body to be exhumed and asked for an international investigation into his 2004 death in a French military hospital.

That came on the heels of a broadcast last week by Arab satellite TV channel Al-Jazeera, which said it had conducted a nine-month investigation into the leader's death after his widow, Suha, handed over Arafat's medical file and what she said was a bag of his belongings.

Switzerland's Institute of Radiation Physics detected elevated traces of polonium-210 — a rare and highly lethal substance — on the belongings, but said the findings were inconclusive. THE ASSOCIATED PRESS

Morocco

Tourists among dead in bus crashes

Two bus crashes in separate locations in Morocco have claimed 27 lives, including those of a German and a Dutch tourist, reported the state news agency Tuesday.

One bus flipped over on a highway Monday evening in the south of the country, killing 17 people.

Earlier on Monday, a bus speeding on mountainous roads along the Mediterranean crashed outside the city of Nador, killing 10 people and injuring 33 others. THE ASSOCIATED PRESS

Olmert

Ex-Israeli PM cleared of charges

An Israeli court cleared former prime minister Ehud Olmert on Tuesday of the central charges in a multi-case corruption trial that forced him from power, but convicted him of a lesser charge of breach of trust.

Olmert, 66, stepped down as prime minister in 2009 to fight allegations that included accepting cash-stuffed envelopes from a supporter and pocketing the proceeds from a double-billing scam on overseas travel. THE ASSOCIATED PRESS

U.S. Man to plead guilty in model-plane bomb plot

A man charged with plotting to fly remote-controlled model planes packed with explosives into the Pentagon and U.S. Capitol will plead guilty to two charges, his lawyers and prosecutors said in a plea agreement filed in federal court Tuesday.

Rezwan Ferdaus, 27, a Muslim-American with a physics degree from Boston's Northeastern University, was arrested in September after federal employees posing as al-Qaida members delivered materials he had allegedly requested, including grenades, machine-guns and what he believed was 11 kilograms of C-4, a plastic explosive.

Prosecutors and Ferdaus' lawyers say Ferdaus will plead guilty to attempting to provide material support to terrorists and attempting to damage and destroy federal buildings by means of an explosive.

The two charges carry a combined maximum of 35 years in prison, but under the plea agreement, attorneys have agreed to request a 17-year sentence. THE ASSOCIATED PRESS

Gradual steps proposed to end Syrian violence

Middle East. Kofi Annan approaches Iraq, Iran in another bid to stop crisis

The UN's special envoy on the Syrian crisis Kofi Annan sought to build support for his peace efforts Tuesday with the leaders of Iran and Iraq, saying President Bashar Assad has agreed to a plan to quell the bloodshed in the most violent areas of Syria and then expand the operation to the whole country.

Top diplomat Annan said at a news conference in Iran that the plan still must be presented to the Syrian opposition. But he said his talks with Assad a day earlier focused on a new approach to ending the violence, which activists say has killed more than 17,000 people since March 2011.

"(Assad) made a suggestion of building an approach from the ground up in some of the districts where we have extreme violence — to try and contain the violence in those districts and, step by step, build up and end the violence across the country," Annan told reporters in Tehran, his first step on a tour of Syria's allies. He did not elaborate on the plan.

Annan later visited Iraq to discuss ways to end the fighting.

The conflict in Syria has defied every international attempt to bring peace, and there was no sign that the plan Annan described Tuesday will be a breakthrough. Although the Assad government's crackdown has turned the Syrian president into an international pariah, he still has the support of strong allies such as Russia, Iran and China.

Several rounds of sanctions and other attempts to isolate Assad have done little to stop the bloodshed. Still, Annan's latest efforts to reach out to Syrian allies suggest he sees them as integral to solving the crisis.

Since Assad took power following the death of his father, Hafez, in 2000, he has deepened cultural, political and economic ties with Iran, making it Syria's strongest regional ally. Tehran, in turn, has boosted Assad's military, providing it with advanced communications technology and weapons.

All of this makes Iran unlikely to support change in Syria.

Annan said he has "received encouragement and co-operation" from the Iranian government but did not elaborate. THE ASSOCIATED PRESS

Lee Sang-deuk THE ASSOCIATED PRESS

S. Korean president's brother faces arrest

A court issued an arrest warrant late Tuesday for the elder brother of South Korea's president on bribery allegations, an embarrassment to the ruling party in a presidential election year.

The Seoul Central District Court issued the warrant hours after enraged protesters threw eggs at Lee Sang-deuk, jostling to get to him as he entered the court for questioning.

A court official declined to provide further details, including his name or when Lee might be arrested, citing court procedures. Prosecutors have accused the former lawmaker of taking half-a-million dollars in bribes from two detained bankers with the intent of using his influence to help the bankers avoid punishment.

Lee wasn't directly hit by any of the eggs, but some yolk could be seen on his shoulder. He didn't speak to a swarm of reporters gathered at the court, shaking off the protesters and media mobbing him before walking through a security checkpoint.

The protesters, many of them middle-aged women, said they'd lost money after the government suspended the troubled savings banks Lee is accused of taking bribes from. THE ASSOCIATED PRESS

Apple

iPads to start selling in China after settlement

Apple will start selling the iPad in China on July 20 after paying $60 million US to settle a dispute over the ownership of the tablet's name.

Apple said it bought the global rights to the iPad name from Shenzhen Proview Technology in 2009, but Chinese authorities said the rights in China were never transferred.

A Chinese court ruled in December that Proview still owned the name in China and the company asked Chinese authorities to seize iPads.

Postmedia reports $12.1-million third-quarter loss

Postmedia Network Canada Corp. said Tuesday it lost $12.1 million in its latest quarter compared with a loss of $2.7 million a year ago, as the newspaper publisher worked to cut costs and transform itself.

The loss for the three months ended May 31 amounted to 30 cents per share, compared with a loss of seven cents per share a year ago.

Revenue sank about seven per cent to $212 million for the period ended May 31, from $227.6 million last year, as advertising revenue fell 10 per cent or about $14.5 million. THE CANADIAN PRESS

RIM execs clash with shareholders over leadership

BlackBerry maker. Chairwoman says she is confident re-elected board will move company forward

Chair Barbara Stymiest and Thorsten Heins, President and CEO of Research in Motion (RIM), talk at the company's Annual General Meeting in Waterloo, Ont., on Tuesday. DAVE CHIDLEY/THE CANADIAN PRESS

Shareholders of Research In Motion expressed their frustration Tuesday with the company's delayed product launch and eroding market share, with some calling for a major upheaval in its leadership.

RIM's annual meeting served as the first time since last summer that most of the company's investors have had an opportunity to speak directly to RIM's executive team, including new chief executive Thorsten Heins.

One shareholder took to the microphone to offer his best wishes for Heins before turning his attention to the board members who have helped guide the company since its heyday as the dominant smartphone.

"They've let this problem that RIM faces ... get out of hand so badly before they did something about it," he said. "I don't think, personally, that any of the old directors of the company should sit here today."

The crowd of about 300 people broke into applause after the comments.

However, despite the vocal criticism, shareholders still re-elected all of the board nominees, though John Richardson had support withheld by 30.2 per cent of the votes.

Investors in the company have been looking for any hints of a timeline for the BlackBerry 10 launch, which was pushed from later this year into the first three months of 2013, missing the key back-to-school and holiday shopping seasons.

Barbara Stymiest, the company's new chairwoman, defended RIM's leadership.

"Part of the dynamics in managing any board is managing smooth transitions, and we will continue to do that going forward," she said.

Economy. Weak recovery creating a lost generation

The weak global recovery is turning unemployment into a long-term structural problem with the potential to scar youth and some workers the rest of their lives, the Organization for Economic Co-operation and Development warns.

In a new report on employment in the post-recession years, the Paris-based economic think-tank calls on policy-makers in large parts of Europe and in the U.S. to take "urgent action" to prevent a cyclical jobless problem from becoming permanent.

Secretary-General Angel Gurria singles out youth unemployment at 16.2 per cent in the 34-country area covered by the OECD, and long-term joblessness — workers that have been without a job for periods of one year and longer and two years and longer.

Canada gets mostly a free pass in the report. The OECD notes unemployment sits at 7.2 per cent in Canada, as opposed to 7.9 per cent for the OECD average, and is projected to decline to 6.4 per cent by late 2013.

Real estate. Market at a tipping point, firm warns

Canadian home prices generally rose in the second quarter and the pace of home-building increased in June, but industry observers say the real estate market is at a "tipping point" and could soon lose steam.

Royal LePage, one of the country's largest real-estate sales organization, said Tuesday that prices for all types of housing were mostly higher in the second quarter compared to both the first quarter of 2012 and the second quarter of 2011.

And prices will likely rise further in some areas, such as Toronto and Winnipeg, the real estate firm added.

But the report suggests some areas are now likely too expensive for buyers at the current levels.

And some of the local markets it tracks showed declines in the second quarter compared with a year ago. Some types of homes in some cities showed lower local average selling prices, such as those in Victoria, B.C., Moncton, N.B., and Saint John, N.B.

Interest rates have remained at the current one per cent since September 2010, which has kept fixed mortgage rates low and helped to spur robust buying activity in the market.

But the Bank of Canada and the federal government have warned the low rate environment may have also encouraged some Canadians to take on more debt than they can afford when rates rise.

There have been numerous reports suggesting certain local markets — notably Vancouver and Toronto — and some kinds of housing, particularly condos, are overvalued and primed for a downward correction.

Aerospace. Bombardier lands $764M contract

Bombardier Aerospace says Latvia-based Air Baltic Corp. has signed a letter of intent to acquire 10 CS300 aircraft and take purchase rights on a further 10 of the passenger jets.

Based on the list price of the CS300, the contract is worth approximately $764 million US and could increase to $1.57 billion US should the 10 purchase rights be converted to firm orders. Bombardier Aerospace, a subsidiary of Bombardier Inc., also has a conditional order for five CS100 and 10 CS300 jetliners placed by an unidentified customer earlier this week at the air show.

"The CSeries aircraft program continues to reach new milestones, expanding into new markets with unique applications," said Mike Arcamone, the president of Bombardier Commercial Aircraft.

Air Baltic serves 60 destinations with direct flights from its home base in Riga, Latvia.

TOUGH TO DENY GLOBAL WARMING WITH RECORD HEAT

JUST SAYIN'
Paul Sullivan
metronews.ca/justsaying

The evidence is mounting.

The past six months have been the hottest in U.S. history. Going back further, the last 12 months have been the hottest in the U.S. since they began keeping weather records and all the meteorologists had beards.

If that's not "global warming," I don't know what is. But, of course, if you're floating along De Nial and you encounter evidence that might capsize your boat, you just toss it overboard.

Science says...

"Angered and frustrated by the intransigence of climate change deniers, the latest results have scientists standing in line to say 'I told you so.'"

There's a great new book by Michael Shermer, the editor of the Skeptic magazine, called The Believing Brain, which argues we have a tendency to form our beliefs first and then go out looking for the evidence to support them, rather than the other way around. How else can you explain the fact that more people believe in angels (72 per cent) than Darwin's Theory of Evolution (45 per cent), even though there is plenty of evidence for evolution (e.g. the entire fossil record) and zero evidence for angels (It's a Wonderful Life doesn't count).

Of course there are exceptions. Like Vancouver, where I live. Vancouver appears to be the sole exception to global warming on the entire continent. While everyone else is sweltering through the hottest summer on record, the poor downtrodden, sodden masses of Vancouver have just been through the fourth coldest June on record. It's been the Vancouver version of winter (10 degrees, raining) since last October.

From where we sit (shivering, cowering), global warming can only be seen as a cruel hoax. It may have reached an all-time record high of 113 F (45 C) in Johnston, S.C., recently, but it only reached or exceeded 20 C five times in Vancouver throughout all of May and June. I've got moss growing on the north side of my house. My feet haven't been warm since 1989, when I moved to the "Wet Coast."

Global warming is a little quirky in spots.

That doesn't mean it doesn't exist. Angered and frustrated by the intransigence of climate change deniers, the latest results have scientists standing in line to say "I told you so." That's except for those scientists whose funding has been cut by the Harper government. They're standing in that other line, the unemployment line.

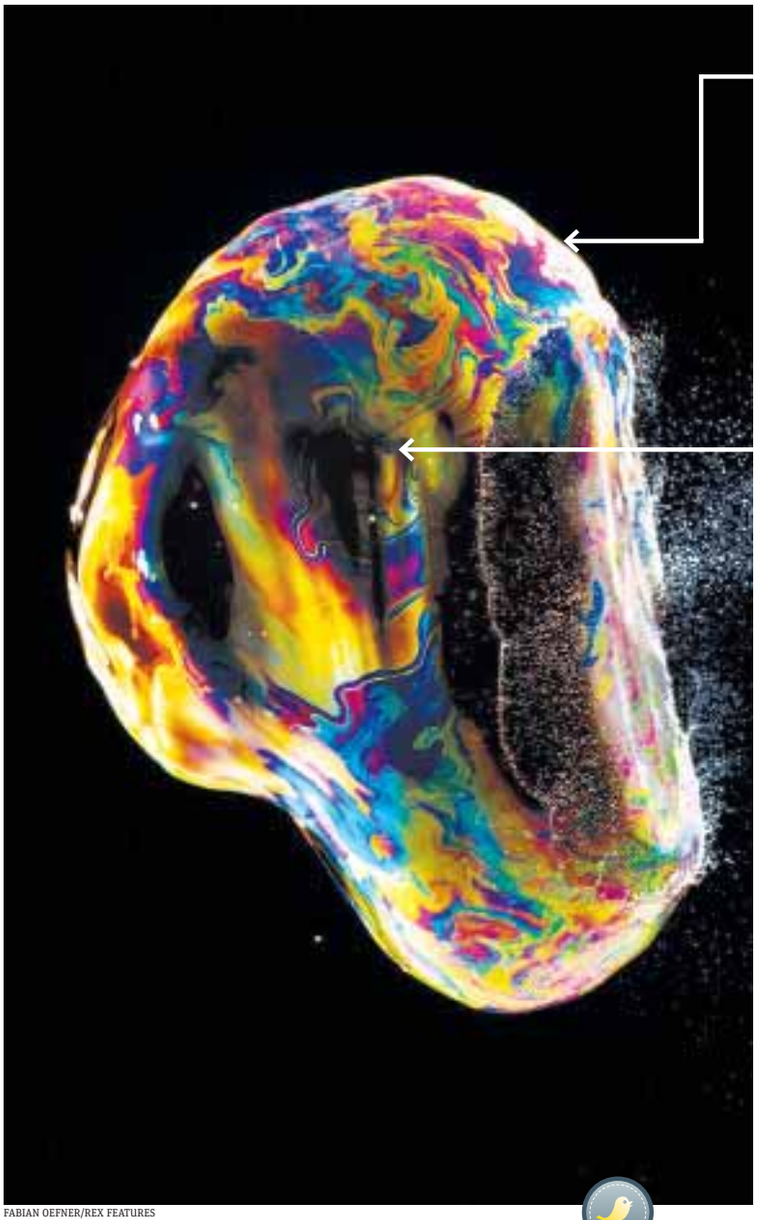
This weather is crazy, just like Jeff Grayson, who somersaults from a rope swing in Cockeysville, Md., in this July 2 photo.
WIN MCNAMEE/GETTY IMAGES

I'm guessing all this hot air will remain an inconvenient truth, especially for the government of Canada, which is among the most heavily invested in denial, thanks to the inconvenient truth that Alberta's oilsands — which mean billions to the nation's economy — are the poster petroleums of climate change.

Still, when Calgary, Stephen Harper's own "greatest city on earth," and principal beneficiary of the oilsands, is in the middle of a nasty heat wave, you have to wonder if he and his oil baron buddies are getting a little hot under the collar.

If they're looking for relief, we in Vancouver will gladly take a couple of degrees.

Sorry to burst your bubble



FABIAN OEFNER/REX FEATURES

Offbeat photography

Artwork goes pop

This surreal amorphous shape looks like something otherworldly, but in truth it's an ordinary soap bubble, made to look spectacular thanks to some ingenious high-speed photography.

Swiss photographer Fabian Oefner, 28, made it his mission to capture the short-lived beauty of bubbles as they burst. METRO

Oefner on his art

- **The first challenge.** "A soap bubble is made of a thin film of water, on which soap molecules gather on both sides. The vibrant colours that bubbles are famous for are created by the reflected light hitting the surface of the bubble — the bubble itself has no colour at all. To make these reflection effects ... I had to place lights around the bubbles from all different sides."

Other uses of bubbles

Bubbles used for thinnest TV screen

Earlier this month, an international research team discovered a way to use a soap bubble screen as the world's thinnest TV display. Japanese and U.S. scientists used ultrasonic sound to change the properties of a bubble's membrane. The technology can be used to display 3-D images using a series of bubble screens put together. Big Brother is back

Julie Chen returns as host for the 14th season of Big Brother. HANDOUT

Top 10 Big Brother moments

To mark the return of the in-fighting and intrigue that makes Big Brother so hard not to watch, we count down some of the craziest moments from the first 13 seasons. The reality show returns to Global this Thursday at 9 p.m. ET/PT.

1 **Torture cage:** A challenge where house guests were locked in a cage for several hours attached to a button with restricted movement. (Season 6)

2 **All washed up:** Housemates had to collect liquid while running through aisles of foam. (Season 8)

3 **Bunny hop:** House guests had to stand on a platform for several hours holding a key during a freezing-cold water downpour. (Season 8)

4 **Name that pie:** A food challenge where house guests had to eat a pie and guess the unpleasant ingredients. (Season 8)

5 **Brownie house:** A food challenge where the contestants had to gain the most weight after eating a large house made of brownies. (Season 3)

6 **Shannon's revenge:** Shannon cleans the toilet with fellow contestant Hardy's toothbrush. Producers had to step in to stop the act. (Season 2)

7 **Renny sleepwalking:** Enough said. (Season 10)

8 **Twins revealed:** Adria and Natalie reveal that they are twins and have been switching places for weeks. (Season 5)

9 **Marcellus gives up veto:** He gives it up because he is certain the team will let him stay, but he winds up eliminated. (Season 3)

10 **Will's veto speech:** The speech when he says he hates everyone and wants to go home. (Season 7)

METRO

Ice Age: Continental Drift continues a Hollywood tradition of bending history. HANDOUT

Hollywood history earns failing grade

Top 10. Here are just a few examples of movies that rewrite the history books to suit their narratives

IN FOCUS
Richard Crouse
scene@metronews.ca

"We fought dinosaurs in the ice age," Sid the Sloth says in this weekend's Ice Age: Continental Drift. "It didn't make sense, but it was fun."

It doesn't make sense because dinosaurs were already extinct by the time Manny, Sid and Diego entered the ice age, but the popular kids' movies aren't trying to teach, they're simply continuing a long-held Hollywood tradition of bending history to suit their stories.

Here are 10 other bits of Hollywood history that earn a failing grade.

1 The movie When Dinosaurs Ruled the Earth drew on Phoenician, Latin and Sanskrit to create a fake caveman language. Here's a quick Berlitz primer in cavespeak: For "come back" say "neecha," "akita" is "look" and "neecro" is "bad."

2 The man-eating Rhedosaurusis in The Beast from 20,000 Fathoms is a dinosaur, but one that no paleontologist would recognize. It's rumoured the mythical beast's name was inspired by the initials of the man who created it, special effects wiz Ray Harryhausen.

3 Mel Gibson wore clothes from the future in Braveheart. The movie is set in the late 13th century, but the kilts he wears didn't come into existence until 300 years later.

4 Instead of dying in the gladiatorial arena, as Gladiator would have you believe, Emperor Commodus was strangled in a bathtub a decade after his would-be movie assassin (played by Russell Crowe) died.

5 The Spartans in 300 run into battle against the Persian army protected only by leather thongs and rock-hard abs, when in fact they wore bronze armour.

In 300, the Spartans are depicted wearing leather thongs and not much else. In reality, they wore bronze armour. HANDOUT

6 As a knight returning from the Crusades in 1272, Nic Cage discovers a plague outbreak in Season of the Witch. Trouble is, the Black Death didn't strike until 76 years later.

7 In 10,000 BC woolly mammoths are used as labour to build the pyramids in Egypt. Wrong! Woolly mammoths weren't desert creatures and the pyramids weren't built until 2500 BC.

8 In Elizabeth: The Golden Age, the Queen is courted by Ivan the Terrible in 1585, who, in reality, was dead by then, felled by a stroke while playing chess.

9 California joins the Union at the end of Legend of Zorro in a ceremony that includes President Lincoln. Whoops! California became a state in 1850 and Lincoln wasn't president until 1861.

10 The title of the historical disaster film Krakatoa: East of Java is a geographical head-scratcher. Krakatoa was actually west of Java.

Scene in brief

Run-DMC to perform for first time in a decade

They haven't performed together in more than a decade, but the surviving members of Run-DMC are set to reunite this fall at the Fun Fun Fun Fest in Austin. Joseph Simmons, now known as Rev. Run, and Darryl "DMC" McDaniels retired the group after their DJ, Jam Master Jay, was killed in 2002. But it was announced Tuesday that the band will be among the performers for the Nov. 2-4 event. Festival organizers say they plan to donate some of the proceeds to the JMJ Foundation for Music, which works to give youth access to the arts. The Rock and Roll Hall of Fame group is best known for hits like Walk This Way, It's Like That and My Adidas.

OUR TAKE ON THE WORLD OF CELEBRITIES

Lily Allen. ALL PHOTOS FROM GETTY IMAGES

Lily Allen pregnant with second child?

After welcoming her first child with husband Sam Cooper in November 2011, Lily Allen is reportedly pregnant again, with a second child due later this year, according to the Sunday Mirror.

"She's pregnant but it's early. Lily doesn't want to talk about it yet," a source says.

"Lily has started telling her friends, and everybody in her close circle is so excited for her."

Last month, Allen announced she was back in the recording studio, but those plans may have to wait.

"It was a surprise, but Lily and Sam are thrilled," a source says of the new pregnancy.

"The pair of them have loved every minute of parenthood so far and wanted to expand their brood quickly. So it's great timing."

Scarlett Johansson

Johansson looking to make bank with Avengers sequel

Scarlett Johansson is going to make a mint for appearing in a planned sequel to The Avengers, reprising her role as Black Widow.

The actress has reportedly been offered $20 million for the film, according to the Sun.

To put that in perspective, though, co-star Robert Downey Jr. reportedly made $50 million for the first Avengers film, which has grossed $1.35 billion worldwide so far.

The Word

Katie Holmes goes to a Spice Girl for marriage counseling

THE WORD
Monica Weymouth
scene@metronews.ca

After she reached a divorce settlement with Tom Cruise on Monday, we were all set to go back to ignoring Katie Holmes for the next decade or so.

But then this little bit leaked: It seems she turned to none other than Victoria Beckham for marriage advice.

"Victoria's been a real tower of strength. Katie's seen how a normal marriage should function by being around Victoria and David Beckham, so she knew that something was wrong with her relationship with Tom," a source tells Now magazine.

"(Victoria) has been trying not to take sides, but she has let Katie know she'll be there for her whatever she chooses to do."

Katie, we get that you've had an exceedingly strange, disconnected five years, but marriage counseling from a Spice Girl?

Did you consult your Barbie legal panel, too?

Join us back in the real world, girl.

Quote

"(Victoria) has been trying not to take sides, but she has let Katie know she'll be there for her."

Kristen Wiig

Kristen Wiig continues to shy away from spotlight

Kristen Wiig is enjoying her budding romance with Strokes drummer Fabrizio Moretti — who used to date Wiig pal Drew Barrymore — but that doesn't mean she's comfortable talking about it.

"I am shyer than most people think," Wiig tells Marie Claire. "I will say that I'm happier than I've been and I feel very lucky right now."

As for her departure from Saturday Night Live after seven seasons, Wiig says that was always the plan.

"I know a lot of people probably assume, 'Oh, she's leaving because she is going to be doing movies now and things like that,' which I will be," she says.

"But I just always knew it was going to be seven and that was it. I think maybe if I were 22, I could see myself staying a little bit, but it just felt like the right time."

Samantha Ronson

Slightly talented celebrity calls out talentless celebrity

Celebrity DJ Samantha Ronson isn't pleased with Paris Hilton's decision to become a DJ, according to TMZ.

"If you're just like, 'Oh, I want to figure out how I can make more money this week,' it insults the people that work really hard at it," Ronson tells the website about the news.

"It's like me calling myself a doctor from reading WebMD twice."

Are you brave enough to descend into a Hell Hole?

Some of the Hell Holes near Napanee, Ont., have ladders so visitors can descend their depths. COURTESY: TOP 115 UNUSUAL THINGS TO SEE IN ONTARIO, BOSTON MILLS PRESS

Book excerpt.
Looking for a trip off the beaten path? Try thumbing through a collection of weird Ontario sites

A walk through the forest can sometimes be a dangerous thing, not necessarily from wolves or bears or even deer hunters, but from a careless step into a hole, especially when the hole leads to Hell.

The limestone ridge along the Salmon River north of Napanee, Ont. contains some of the area's most unusual natural features. There are caves, crevices and odd-looking rock columns. But the strangest of the oddities are what locals call the "Hell Holes."

To early settlers unfamiliar with geology, these holes in the forest floor seemed to have no end. While most are little larger than foxholes, a few are large enough to allow a human to squeeze through. Those who braved the descent found caverns that stretched in many directions.

Geologists refer to these phenomena as "karst" features. Karst topography occurs when soft limestone layers beneath a hard upper layer dissolve in water. This weathering causes caves and caverns, and the Hell Holes.

Similar to caves, the holes in the forest floor can open into large, pitch-black rooms, one of which was once large enough to hold 20 people (it later collapsed). While there are other locations in Ontario

with similar features, the ridge by the Salmon River, near the village of Roblindale, offers the greatest concentration of these cavities. Most are located in the privately run Hell Holes Park. Here, a self-guided trail, a little over three kilometers long, leads not only to the strange holes, but also over natural rock bridges, through eerie canyons lined with layered cliffs and columns, and then to the Devil's Horses' Stable hole, 7.5 metres deep and 2.5 by 3.5 metres square. A ladder leads to those depths.

Hell Holes Park is located on Centreville Road about 5.5 kilometres east of Highway 41, and 10.7 kilometres north of Highway 401 (Exit 579). Snacks, gifts and, of course, flashlights are available in the log cabin shop. It is said that one visitor even took his wedding vows in the Hell Holes. The duration of this marriage is not known.

USED WITH PERMISSION FROM TOP 115 UNUSUAL THINGS TO SEE IN ONTARIO, 3RD EDITION, REVISED & EXPANDED BY RON BROWN (BOSTON MILLS PRESS, 2012, $24.95 PAPERBACK).

Montreal hotel tops customer review

A downtown Montreal hotel boasting an art collection featuring the likes of Andy Warhol, Roy Lichtenstein and Marc Chagall has topped Expedia's annual list of the best Canadian hotels. LHotel, located on Rue Saint-Jacques near the Palais des congress, scored highest in 2011 in Expedia customer reviews, says the online travel agency. The hotel, which opened in 2001, occupies an 1870 building that first served as the head office of the Montreal City and District Savings Bank. Artworks are displayed in public areas and guest rooms of the property. Other top-rated Canadian hotels on the Expedia.ca list: Pan Pacific Whistler Village Centre, Whistler-Blackcomb, B.C.; Four Seasons Vancouver; Prince George Hotel, Halifax; and Pinnacle Hotel at the Pier, North Vancouver. The No. 1 hotel in the world, according to Expedia, was Marrol's Boutique Hotel in Bratislava, Slovakia. In the world ranking, LHotel placed 59th. The global list identifies the top hotels available on Expedia based on quality and value scores.

Canadians not always aware of medical costs when travelling: BMO survey

Turn cherries upside down (literally) in simple, yet mouth-watering, cake

Ingredients

Filling
- 3 tbsp (45 ml) unsalted butter
- 1/2 cup (125 m) brown sugar
- 4 cups (1 l) California cherries, pitted

Cake
- 1/2 cup (125 m) unsalted butter
- 1 cup (250 m) granulated sugar
- 2 eggs
- 2 tsp (10 ml) vanilla
- 1 1/2 cups (375 ml) all-purpose flour
- 1 1/2 tsp (7 ml) baking powder
- 1/4 tsp (1 ml) each baking soda and salt
- 1/4 tsp (1 ml) nutmeg
- 1/2 cup (125 ml) buttermilk
- Icing sugar (optional)

1. Preheat oven to 350 F (180 C). Grease a 9-inch (23-cm) baking pan. In small pan, melt butter, then stir in brown sugar, and cook until sugar dissolves and boils for 1 minute. Pour into pan and spread evenly. Arrange cherries in a single layer over sugar mixture.

2. Using an electric mixer, beat butter until creamy. Gradually add sugar and continue to beat until creamy. Add eggs one at a time, scraping down sides until blended. Add vanilla and beat. In a small bowl, stir flour with baking powder, baking soda, salt and nutmeg. Gradually add flour to butter mixture alternately with milk, starting and ending with flour.

3. Spread batter evenly over cherries. Bake in centre of preheated oven until a toothpick comes out clean, about 60 to 70 minutes. Check cake after 50 minutes, and cover loosely with foil if getting too dark. Run a knife around the edge of cake pan. After 15 minutes, carefully invert onto a cake plate. Serve warm or at room temperature. Just before serving, dust with icing sugar if you like. **NEWS CANADA/ ADAPTED BY EMILY RICHARDS, PROFESSIONAL HOME ECONOMIST, COOKBOOK AUTHOR AND TV CELEBRITY CHEF. Drink of the Week

Orange Dreamsicle Milkshake

For the frosty part of this milkshake, go with sorbet. Though high in sugar, sorbets generally have no fat. For creaminess, use cottage cheese. The curds blend smooth with a rich and creamy texture. Add in a bit of fat-free half-and-half to finish.
- 1 cup orange sorbet (mango also is good)
- 1/2 cup low-fat cottage cheese
- 1/2 tsp vanilla extract
- 1/2 cup fat-free half-and-half

In a blender, combine all ingredients. Blend until smooth. If you prefer a thinner consistency, drizzle in additional half-and-half while the blender is running until you get the desired consistency. Serve immediately. **THE ASSOCIATED PRESS**

Sink your teeth into a rich and creamy strawberry pie

The English enjoy fresh strawberries with dollops of rich clotted cream, which comes exclusively from counties Devon and Cornwall in the southwest of England.
Devon custard, available in select stores in Canada, adds creaminess to this strawberry filling.

This serves six. THE CANADIAN PRESS H/O

Ingredients

Crust
- 1 1/3 cups (325 ml) graham wafer crumbs
- 3 tbsp (45 ml) granulated sugar
- 1/3 cup (75 ml) butter, melted

Strawberries
- 2 cups (500 ml) sliced locally-grown strawberries
- 2 tbsp (30 ml) granulated sugar
- 1 packet (7 g) gelatin

Filling
- 1 brick (250 g) cream cheese, softened
- 1/2 cup (125 ml) granulated sugar
- 1 cup(250 ml) canned Devon custard

Topping
- 1/2 cup (125 ml) 35 per cent whipping cream
- 1 tbsp (15 ml) granulated sugar
- 1/2 tsp (2 ml) vanilla
- 6 medium whole locally grown strawberries

1. Crust: In a bowl, combine wafer crumbs and sugar. Stir in butter until evenly moistened. Press firmly into lightly greased 23-cm (9-inch) pie plate. Bake in a 180 C (350 F) oven for 8 to 10 minutes or until golden brown around edge. Let cool completely.

2. Strawberries: In a medium bowl, stir together strawberries and sugar. Cover and let stand to release juices for about 45 minutes. Reserve strawberries; pour off juices and measure at least 50 ml (1/4 cup) juice; stir in gelatin. Microwave on high for about 30 seconds or until gelatin dissolves, stirring once or twice. (Or set dish in shallow pan of boiling water until gelatin dissolves.) Let cool slightly; stir into strawberries.

3. Filling: In a food processor, combine cream cheese and sugar; process until smooth, scraping down side. Add strawberry mixture; process to puree berries. Add custard; process until well combined. Pour into prepared crust. Refrigerate until set, about 4 hours.

4. Topping: In deep bowl with electric mixer, whip cream to soft peaks with sugar and vanilla. Serve pie with whipped cream and strawberries. **THE CANADIAN PRESS/FOODLAND ONTARIO**

Upside Down Berry Cheesecake. Pudding with tasty tangy flavours

If you are using fresh berries, freeze them for about half an hour. The chill helps set the pudding.

1. Chop any large berries into smaller pieces; set aside. In a bowl, using an electric mixer, beat cream cheese with sugar until fluffy; gradually beat in milk and vanilla until blended and smooth. Stir in berries.

2. Spoon into dessert cups or dishes and sprinkle with graham crackers. Serve immediately or cover and refrigerate for up to 2 days. **THE CANADIAN PRESS/ DAIRY FARMERS OF CANADA**

Ingredients
- 375 ml (1 1/2 cups) mixed frozen or fresh berries, slightly thawed
- 250 g (1 brick) cream cheese, softened
- 50 ml (1/4 cup) granulated sugar or icing sugar
- 50 ml (1/4 cup) milk or any type of cream
- 2 ml (1/2 tsp) vanilla
- 125 ml (1/2 cup) crumbled graham crackers, oatmeal cookies or chocolate cookies

Planning a perfect pursuit

Not exactly what you were looking for? Try to stay open to unexpected opportunities. They might just lead to your dream position. ISTOCK

I need help with the hunt! Getting you from looking for a job to locking one down

CATHY KEATES
TalentEgg.ca

Which qualities are essential to entry-level job search success?

I love having a chance to answer this question because the qualities which are important in job searching are often overlooked. A lot of time is spent determining the 'right' skills and worrying about having the 'right' degree. Not a lot of time is spent thinking about the process of the job search itself, and what helps you to see it through to completion (i.e., to a job offer!).

Persistence The importance of persistence is obvious. Any job search takes time and effort. And while you will find success at the end, and lots of interesting information, helpful people, and a variety of leads, along the way, there will inevitably also be doors that close, dead ends, and unhelpful people too.

When and if you stumble (and we all do), it's the ability to pick yourself up and keep going that will get you to your goal. It seems corny to say "never give up," but really being persistent and holding on to the belief that things will happen, is one of the most important qualities for successful job searching.

Commitment to networking
Almost every successful job search is based on networking. And not just the activity of networking, but the personal commitment to get out there and continually work on your networking. For some people this is really taking yourself out of your comfort zone. It can be way easier to just sit at your computer (alone, in your comfortable home) and surf job posting sites. Talking with people, real live people, can seem way scarier, but, ultimately, job search success comes from continuing to be committed to connecting with people.

Flexibility Being flexible means being open to the unexpected opportunities and ideas that will come your way as you job search. Where we end up is rarely exactly where we expected. Your job search is not usually like going to the grocery store, where you head directly to the aisle with the product you want, and grab it. It is more like an exploration.

Until you have done a lot of your research and job searching, you won't know which aisles have what and what jobs in what organizations are even available right now. And what is available will be constantly changing. More often I find that successful people narrow things done to a focus, but a focus that leaves space for some flexibility.

Student Voice

The key to my success? Staying specific

Zaid Toorawa
Graduate
Bachelor of Administrative Studies (Honours in Management)
York University
TalentEgg.ca

Before my final year at York University, I began to look for opportunities and started to follow up with my networks. It was not as easy as it looked.

I was successful in getting interviews, but actually landing a job was fairly difficult. In my final semester, I went through about five interviews in which I had a zero per cent success rate. I was nervous when graduation day came and I still had no full-time job.

Even with experience throughout school, it was extremely difficult to land your 'type' of job. I realized soon enough that I was all over the industry and had the mindset of just 'landing a job.' I hadn't cared about where I was looking and which was my first step to failure. Then I soon realized I wanted to target specific companies in the banking industry through my networks and was able to land a job successfully.

Where I am now
I currently am employed at CIBC World Markets as a Financial Analyst. I am looking to apply to B-school for September 2013.

My recommendations for employers, schools and career centres
Emphasis should be placed on developing new skills and educating students on how to gain a competitive advantage. Schools should organize networking events on a regular basis as it would allow students and new graduates to have some sort of motivation, especially with the downturn of the economy.

My recommendations for students
Get involved and start networking. When I started my first year at York University, I did not know where to look for advice, nor was I receiving any. I personally wouldn't want students to network solely in their final year of school rather than throughout their degree. What makes him/her stand out from other graduates/students? How is he/she more qualified? Why should we choose him/her? These are some of the questions employers tend to ask themselves when choosing their desired applicants. Do something different, get involved and network!

Run with it. Athletic experience can give you a competitive edge

It's no secret: athletes are the demigods of college and university life.

While some athletes will be fortunate enough to turn pro, most will have to contend with a completely different playing field: the professional workplace.

What works in an athlete's favour is the constant pressure to perform under demanding conditions and the need to make quick and accurate decisions. Moreover, competitors in team sports are presumed to have above-average interpersonal and communication skills.

"Achievement in athletics requires discipline, focus, sustained effort, and working towards specific goals. These character traits are ingredients for success in virtually any field, but they work especially well in finance," says former Merrill Lynch VP Mark Kolakowski.

A hockey player both during his time at Harvard University and while pursuing his MBA at Wharton, Kolakowski says the reason the finance industry loves hiring former athletes is pretty simple: they work hard and they play to win.

Game highlights

- **Don't just list your achievements.** Instead, demonstrate with as much specificity as possible exactly how your athletic background has groomed you to excel in the job being offered, and how you're a better candidate than the average applicant because of your experience.

- Merrill Lynch VP Mark Kolakowski

While common convention assumes that gender stereotypes still put women at a disadvantage over men in the recruitment process, Kolakowski says female athletes have an advantage over both other women and men without similar backgrounds.

"A female athlete who markets herself effectively should come across as a more impressive job candidate than non-athletic men, even for traditionally male-dominated positions in traditionally male-dominated organizations," he adds. He continues that it helps if the recruiter is a sports fan or a former athlete as well, since the candidate will have the opportunity to establish personal affinities during the interview which another candidate without an athletic background might have difficulty developing. **JELEEN YU IS A WRITER AND EDITOR FOR THE NEWSLETTER OF A NON-PROFIT MICROFINANCE ORGANIZATION IN THE PHILIPPINES CALLED KFI (KAALALAY FOUNDATION, INC.).**

Stroman's Blue Jays journey underway in Vancouver

MLB. Highly-touted pitching prospect 'ready to go' in single-A

Marcus Stroman hopped on a bus Tuesday morning as he began the ride to what he hopes will be a career in the big leagues.

The Toronto Blue Jays pitching prospect, chosen in the first round of this year's Major League Baseball draft, is getting ready to commence his career with the Vancouver Canadians of the single-A Northwest League amidst high hopes from the parent club.

He is expected to take the mound Wednesay against the Boise Hawks.

"I feel like I'm ready to go," said the 21-year-old. "There'll definitely be some butterflies in my stomach when I'm out there for my professional debut, but I'm excited, man. I can't wait to get out there and compete. I'm ready to roll."

The Blue Jays took Stroman with the 22nd pick overall. Assistant general manager Andrew Tinnish, formerly the team's scouting director, and Toronto manager John Farrell have said Stroman could rise to the majors by September. Usually, clubs avoid such predictions about players starting out in single-A ball.

"I've started to develop a pretty close relationship with some of the guys here, and I'm just enjoying them," said Stroman. "The guys are awesome on this team. So I'm not worried about moving up or anything. "

The right-hander from Long Island, N.Y., joined the Jays organization after three standout seasons at Duke University, where he struck out 136 batters in 98 innings last season. He also starred for USA Baseball's Collegiate National Team in the summer of 2011 as a closer.

"I'm just trying to focus on what I can do for the Vancouver Canadians."

Toronto Blue Jays pitching prospect Marcus Stroman on focusing on his single-A career and not a quick jump to the major leagues.

Pitching woes in Toronto

The Blue Jays pitching staff continues to be decimated by injuries.

- The club announced Monday night that left-handed reliever Luis Perez will miss the rest of the season with a torn ligament in his throwing elbow.
- The Jays have had seven pitchers on the disabled list this season at one time or another.

Former Armstrong staffers given lifetime bans

With Lance Armstrong still digging in for a legal fight, the U.S. Anti-Doping Agency on Tuesday issued lifetime sports bans to three former staff members and consultants on Armstrong's winning Tour de France teams for doping violations. Luis Garcia del Moral was a team doctor; Michele Ferrari a consulting doctor; and Jose (Pepe) Marti a team trainer for Armstrong's U.S. Postal Service and Discovery Channel squads. All had been accused by USADA of participating in a vast doping conspiracy on those teams during part or all of Armstrong's seven Tour de France victories from 1999-2005. Armstrong also has been charged and has declared his innocence.

MLB players to discuss expanded HGH testing for next season

The American League's Justin Verlander of the Detroit Tigers pitches to the National League's Carlos Gonzalez of the Colorado Rockies during the first inning of baseball's all-star game on Tuesday night in Kansas City. Union head Michael Weiner, speaking to the Baseball Writers' Association of America, said Tuesday afternoon that players will be discussing whether to expand testing for human growth hormone to the regular season in 2013. Each player was given a blood test for HGH during spring training as part of the labour contract that was agreed to in November, which allows blood testing during the off-season and spring training, and if there is reasonable cause. For more coverage of the all-star game, go to metronews.ca/sports. DILIP VISHWANAT/GETTY IMAGES

Diego Maradona was popular with fans and helped put United Arab Emirates soccer on the map, but after his team finished eighth in a 12-team league, he was fired on Tuesday after one season as coach of Dubai club Al Wasl. Scan the code for the story.

Tour de France. Sources say French rider among three arrested in doping probe

The longtime problem of doping hit the Tour de France head-on Tuesday when a French rider was arrested at his team hotel and suspended by his team.

Police made their move on the Tour's first rest day in arresting Cofidis cyclist Remy Di Gregorio, with judicial officials saying two other people suspected of supplying the Frenchman with banned substances were also arrested — one along with the rider in Bourg-en-Bresse, and another in Marseille.

Calvillo returns to practice

Montreal Alouettes quarterback Anthony Calvillo returned to practice Tuesday, a day after skipping a session because of a bruised left shoulder.

The 39-year-old pivot was hurt in Montreal's 41-30 win over the Winnipeg Blue Bombers on Friday.

"I'm feeling good and I'm looking to play on Thursday against Calgary," Calvillo said.

The Als will be looking for revenge against the Stamps after Calgary demolished Montreal 38-10 in Week 1. THE CANADIAN PRESS

NBA. Lewis follows fellow ring-chaser Allen to Miami

Rashard Lewis has decided to join the Miami Heat, becoming yet another shooting option for the reigning NBA champions.

Agent Tony Dutt said the free agent forward and the Heat agreed to terms on Tuesday, and Lewis is expected to sign his contract Wednesday. Lewis' decision comes just four days after Ray Allen agreed to accept an offer from Miami.

Allen and Lewis were Seattle teammates from 2003 through 2007 and both figure to fit perfectly into Miami's plan to surround LeBron James, Dwyane Wade and Chris Bosh with even more long-range shooters.

By the numbers

$1.3M

Lewis will make the veteran minimum from Miami for this coming season, worth about $1.3 million. He will pick up another $13.7 million from the final year of his most recent contract — a $118 million, six-year pact — that was bought out earlier this off-season by New Orleans.

Allen's 2,718 made three-pointers are the most in NBA history, and Lewis ranks fifth among active players with 1,690 makes from beyond the arc. THE ASSOCIATED PRESS

Horoscope

Aries | March 21 - April 20. What worked for you in the past won't necessarily work for you in the future, so be ready to move with the times. Always be flexible.

Taurus | April 21 - May 21. Change may not come easily to those born under the sign of the bull but change you must — and soon. Let the planets guide you today and let the world see that you've got an adventurous side too.

Gemini | May 22 - June 20. You already know what is and is not possible – you don't need anyone telling you – and if you apply that knowledge, you will enjoy success.

Cancer | June 21 - July 22. Others may make light of your efforts but the planets indicate you are on the verge of a major success that will make critics green with envy.

Leo | July 23 - Aug. 22. Planets warn if you try to get out of what you are expected to do today, you'll have to do twice as much tomorrow.

Virgo | Aug. 23 - Sept. 22. You have some tough tasks ahead of you and no doubt you are worried that you might fail. Don't be. If you approach what you have to do in the right spirit, you will win through sooner or later – probably sooner.

Libra | Sept. 23 - Oct. 22. Saturn in your sign warns you must not take shortcuts. A job that is worth doing is a job that is worth doing well — and a job that is done well is likely to be well rewarded.

Scorpio | Oct. 23 - Nov. 21. You will have to be firm with a friend or work colleague today. If you let them off the hook now, they'll only let you down again later. Next time, the consequences will be dire.

Sagittarius | Nov. 22 - Dec. 21. Try not to be too eager when negotiating with people who have something you want. If they get the impression that you are desperate, you will end up paying double.

Capricorn | Dec. 22 - Jan 20. With Saturn, your ruler, moving through the career area of your chart, you must be serious about your ambitions.

Aquarius | Jan. 21 - Feb 18. You have been thinking about making some big changes for quite some time but you are still in the same place. It's time to get serious.

Pisces | Feb. 19 - March 20. Everyone seems to be on your case at the moment and you are wondering what you have done to deserve such negativity. Don't worry, they will get over it. SALLY BROMPTON
